This ERC: produces an award, holds only bidder bonds
1 Open
reserve r · units · bond B
maxBidders · slashRecipient
targetRef = H(chainId, contract, id)
profile: price-binding | allocation-only
2 Commit
post H(tenderId, bidder, bid, salt)
lock bond B
at most maxBidders commitments
3 Reveal
open (bid, salt) after commits close
bond returned on a valid reveal
reveals are public, one by one
4 Finalize
award(bids, r, units) → (winner, price)
re-check: price ≤ r, unique winners
unrevealed bonds credited for slashing
Pricing rule (award.*): a swappable pure contract
first-price · vickrey (recommended) · uniform-price · posted-price
authority boundary
Targets decide what it changes
ERC-8183 job escrow
price-binding via an escrowing adapter; a client acting on its own is allocation-only
ERC-8195 task market
Auction-mode selection reads awardOf instead of a fixed lowest-bid rule
ERC-8414 task tender
price-binding: mint after award (AwardThenMint); fixed reward: posted-price only
